

Professional Parking Solutions

## Zeag South Africa – Ready for Kick Off

Zeag South Africa the wholly owned Zeag Group subsidiary based in Johannesburg, South Africa has had a busy time completing various parking projects in South Africa in time for the prestigious World Cup 2010.

Offering a range of solutions to South Africa the company has been very successful in providing this region with state of the art, turnkey parking solutions.

Numerous installations have been completed in time for the World Cup including Green Point Stadium, Cape Town and Nelson Mandela Stadium, Port Elizabeth, two venues for 2010 WC and the stadiums of choice for a semi final and 3<sup>rd</sup>/4<sup>th</sup> place playoffs respectively.

Zeag SA has also supplied and installed Orion XR at Cape Town International Airport (CTIA) which includes an integrated bus rapid transport control system using Long Range Readers that links into the City Wide Transport Network. Gavin Scott, Retail Manager, Cape Town International Airport recently commented of Zeag, “I can confidently recommend Zeag as a solid, reliable supplier. They are certainly experts in their field.”

Zeag has also installed revenue parking equipment at a number of up market 6 star hotels including Crystal Towers, Century City and 15 on Orange, City Bowl. These hotels have integrated the hotels Ving Card Key system into the parking system to ensure a seamless experience from their customer’s perspective. Parking Guidance and Variable Message Signage complete the installations at these hotels.

Other successes within Cape Town where Zeag have installed Orion XR include numerous shopping malls, mixed use developments, hospitals and regional centres.

Another Zeag SA success is OR Tambo International Airport - Africa's busiest airport, with a projected annual capacity of 28,000,000 passengers in 2010. The airport is the hub of South Africa's largest international and domestic carrier, South African Airways (SAA), various other international carriers as well as a number of smaller local airlines. With 17000 parking spaces it is the largest parking facility in Africa. Zeag SA has installed a complete turnkey integrated solution which includes Variable Message Signs, Bay Monitoring, License Plate Recognition, Credit Card acceptance (Chip & Pin), pre-paid solution and integration into the hotel “City Lodge”. With a network solution that spans over 6km and over 300 ZEAG Orion peripherals this clearly demonstrates the power and stability of the Zeag Management System (ZMS) – the core software module for linking Zeag car park equipment.

Zeag SA has also been successful in installing ZEAG Orion equipment at Port Elizabeth Airport, East London Airport, George Airport, Wonderboom Airport, Kruger Mpumalanga International Airport, in total 12 airports in the region.

Craig Cockburn, Managing Director of Zeag SA states “It’s all about teamwork, and like most top

Professional Parking Solutions

class teams we get the result. Our service is the best in the industry – we stick to our commitments and deliver”.
